## NATHANIEL OSTRER

69 Brown Street, Box #5133  
Providence, RI 02912

---

### Education

---

- Brown University**, *ScB Computer Science expected May 2021* (Providence, RI) 9/17 – Present
- Relevant coursework: Accelerated Intro to Computer Science, Software Engineering, Deep Learning, Probability for Computing and Data Analysis
- The Dalton School**, *High School Diploma* (New York, NY) 9/12 – 6/16
- Completed “Data Structures and Algorithms in Java” at Columbia University

---

### Work Experience

---

- Apptimize Inc.**, *Software Engineering Intern* (San Francisco, CA) 05/18 – 08/18
- Updated iOS and Android Test apps, using Objective-C and Java
  - Wrote new tests for Jenkins and Travis CI setup
  - Updated automated Python deployment script for SDK
  - Wrote initial React Native test app for JavaScript SDK
- DATA 1030**, *Teaching Assistant* (Providence RI) 05/18 – Present
- Design and implement an introductory Python and Data Science course for Master’s students
  - Automate grading process for Brown Data Science Initiative using Python
- Serre Lab**, *System Administrator* (Providence RI) 04/18 – Present
- Maintain lab computers for neuroscience research lab at Brown University
  - Automate the removal of legacy data from university servers with Python script
- Bowery Labs Inc.**, *Software Engineering Intern* (New York, NY) 7/16 – 10/16
- Used Python to train a machine learning model to predict NYC subway train arrivals
  - Contributed to Java code for back-end routing system for real time transit directions

---

### Projects

---

- Bairea, Treehacks, 2018**, *Team Member* (Stanford, CA) 2/18
- Developed a cheap, mobile air quality sensor to map air pollutants
  - Wrote a service on Google App Engine, using Python, to log and visualize sensor data
  - Won TomKat Prize for Sustainability out of 1000+ hackers
- Sight, YHack 2017**, *Team Member* (New Haven, CT) 12/17
- Developed an app that helps visually impaired individuals navigate and interact with their surroundings
  - Reverse engineered Facebook’s tagging service to identify a user’s friends
  - Applied Google’s Vision API for OCR, label detection, and facial sentiment analysis
  - Won 1<sup>st</sup> place overall out of 1000+ hackers and best use of a Facebook API or SDK

---

### Leadership Experience

---

- Atomic Theory Robotics Team, The Dalton School**, *Captain* (New York, NY) 9/15 – 6/16
- Led a team of 15 students in building and programming a robot to perform various challenges
  - Competed in the FTC world robotics competition in St. Louis

---

### Skills & Interests

---

**Programming Languages:** Python, Java, JavaScript, C, Objective-C, SQL, HTML, CSS

**Technical:** Functional Programming, Unix, Google Cloud Platform, AWS, Jenkins CI, Travis CI, GitHub, Jira, Confluence
